Description

As a professional [hand warmer manufacturer](#), we can help you to customize your own brand disposable air-activated hand warmers. It's high quality and portable. We can help you to customize the heating duration, average temperature, highest temperature, heating up time, and packaging according to your requirements.

The [hand warmer](#) is composed of a raw material layer and a non-woven bag. The raw material layer is mainly composed of carbon powder, iron powder, inorganic salt, water and some additives. The polymer can be oxidized in the air and release a lot of heat. , Non-woven fabrics are mainly used to package the active substances inside, and have the properties of leak-proof and breathable.

The heating principle of the hand warmer is chemical exotherm, which is a chemical reaction without gas, and is not harmful to the user. However, the hand warmer is not suitable for long-term use. The human body has its own body temperature regulation system. Long-term use of the hand warmer will make the human body The temperature regulation function of the human body is inhibited, and the body's ability to resist the cold from food is slowly reduced. When the hand warmer is not used, it is very easy to catch a cold.

Hand warmer was originally a medical heating pack, which is a disposable heating pack for heating the drug solution during infusion. The internal heating reaction of the hand warmer is an oxidation reaction, and the raw materials and products are non-toxic, so there is no side effect. .

The function of physical therapy and health care of hand warmer

1. The main function of the Hand warmer is to dispel cold and keep warm, which can promote the microcirculation of the human body. It has a good pain relief function for symptoms such as frostbite of hands and feet, bone injuries, and muscle injuries.
2. Promote the smooth flow of the meridians of the human body, and heat the relevant acupoints, which can eliminate symptoms such as spleen and stomach deficiency and cold, and menstrual blood obstruction, and has the effect of promoting blood circulation and removing blood stasis.
3. It has a relieving effect on various chilly diseases, such as arthritis, frozen shoulder, waist and leg pain, rheumatism and rheumatoid.
