Description

The foot warmer is used to keep your feet warm in winter. Above 40 degrees can be warm for more than 5-8 hours.

One-stop foot warmers manufacturers. Browse a wide range of foot warmers. Custom your own package and create your own brand foot warmers.

The U-shaped tape of the warm foot patch is neatly sealed and has no material clamping.

The warm foot patch adhesive uses high-quality medical adhesives.

How to use?

Tear off the adhesive (or without tearing off the adhesive) and put it directly in the shoe.

A safe and warm patch-suitable for people of all ages. For people:

**Beauty-loving women.**

In the cold winter, women who love beauty can put on a foot warmer when shopping, going to work, and playing. Warm your body and your heart, just like the love of a boyfriend, staying with you all day long, warm and caring!

**People who need to get rid of the cold.**

Warm patches can drive away cold, especially suitable for people who have stomach cold, uterine cold, joint rheumatism and other discomfort caused by cold in the body.

**Beautiful bride.**

To hold a perfect wedding in the cold winter, of course, warm patches are indispensable. A thin piece, the stickers will be warm all day long, beautiful and not freezing! Show your brightest smile and be the most beautiful bride!

**Children going to school.**

The warm stickers my mother gave me gave me a whole day of warmth, so that I would never fear the cold in class and outdoor activities!

**The elderly at home**

Of course, the elderly at home in winter must first be particularly caring. Put a piece of warm patches on the hearts of grandparents, parents, and vests to increase blood circulation and keep them warm throughout the winter!

**Field activist**

When working and activities in the field, put on a heat warm patches to keep you warm from the cold and keep you warm all day long!
