### Description

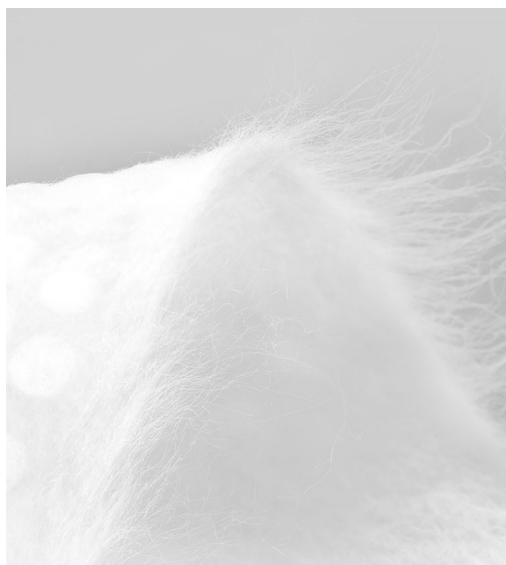

The advantage of the steam eye mask is that it can automatically release heat and apply it on the eyes, which can effectively relieve eye fatigue and even lighten dark circles. In addition, you can use a steam eye mask before going to bed, which can improve the quality of sleep and help you sleep. If the steam eye mask is used excessively, the eyes may become congested, and the pores of the eye skin may become clogged, resulting in acne-like particles.

Steam eye mask is a product that can automatically emit heat due to market demand, and it originated in Japan. Put the steam eye mask on the eyes, it can produce water vapor that makes the eye skin feel more comfortable, and can promote blood circulation around the eyes. If you insist on using it for a long time, it can also play a role in diminishing dark circles. The process of using a steam eye mask is a bit similar to applying heat to the eyes. For office workers who face computers all day, the appearance of steam blindfolds can help them care for their eyes.

The time for using the steam eye mask should be controlled within 10-20 minutes. It should not be used frequently every week, preferably 3~4 times. When using the steam eye mask, if you are in the state of applying eye makeup, it is best not to wear the steam eye mask, otherwise the entire eye makeup will be ruined. You can't put on the steam eye mask immediately after dripping the eye drops, wait until the eye drops the eye drops before you can wear it. In addition, people who wear contact lenses must remove the contact lenses before they can use the steam goggles. Otherwise, the contact lenses may be damaged at high temperatures.

Choose highly efficacious steam eye mask from within the vast collection offered by the best steam eye mask manufacturer. Factory outlet, quality assurance, steady delivery and wholesale price.
