Description

The body warmer keeps heating for about 12 hours, a natural, non-irritating and safe warm patch.

The arc-edge humanized design makes it easy to open. Use high-quality non-woven fabric with strong air permeability to ensure rapid heating.

High-quality activated carbon, iron powder, environmentally friendly and healthy, you can plant flowers after use. Reduced iron powder is refined iron powder after the second reduction to remove heavy metal substances, the purity is above 99.99%, and the price is twice that of refined iron powder. Using reduced iron powder as raw material is safer and more environmentally friendly.

As one of the leading warm patches vendors in China. We offer a wide range of body warmers, hand warmers and footer warmers for the warm pads industry.
