Description

The body warmers are based on the principle of "oxidation exotherm" of iron. The activated carbon contained in the product promotes the oxidation reaction of iron powder, thereby releasing heat. The use of microporous oxygen permeation technology makes the product have the characteristics of balanced heat dissipation and long-lasting heat.

Material: iron powder, water, activated carbon, vermiculite, water-absorbent resin, sodium chloride, wormwood plant extract.

How to use body warmers?

Open the sealed package, peel off the peeling paper, don't need to rub it, please stick it directly on the clothes (avoid using it directly on the skin).

Find quality warm patches from the top body warmers manufacturer. We offer the highest quality warm pads for small brands and big brands all over the world.

Tips:

Avoid direct sunlight and extreme dryness, please store in a cool place. Because the shelf life and heat effect time may be affected by the different placement environment.

Please keep it out of reach of children, people with cognitive disabilities and pets.

We will do our best to ensure that our products are of good quality. In the unlikely event that a defective product is found, please send the product back to our company and we will exchange it.
